LinkedIn • GitHub • Portfolio

I'm a passionate, self-taught Frontend Developer with 2+ years of experience building modern, responsive web applications. I specialize in React, Next.js, and TypeScript, with a strong focus on creating accessible and performant user interfaces. Now I am looking for opportunities to learn, grow, and contribute as a Frontend Developer.

Work Experience

Junior Frontend Developer

XENOptics Co., LTD, Thailand   *xenoptics.com*   Oct 2023 – Present

- Develop and maintain Network Management System (NMS) and Element Management System (EMS) for monitoring and managing network machines
- Design and implement user-friendly interfaces, interactive visualizations for real-time monitoring of machine statuses, and good performance of UI using the Atomic Design Pattern
- Collaborate closely with backend teams to integrate APIs
- Follow company coding standards and best practices
