Dear Hiring Manager,

I am writing to express my strong interest in Frontend Developer and Full Stack Developer opportunities at your organisation. With over two years of professional experience delivering production-grade web applications using React, TypeScript, and Next.js, I am confident in my ability to contribute meaningfully to your engineering team from day one.

My technical foundation spans the full modern frontend stack. At XENOptics Co., LTD, I was responsible for building and maintaining the Network Management System (NMS) and Element Management System (EMS) dashboards used to monitor live network infrastructure. In this role I worked extensively with React, TypeScript, Redux Toolkit, Tailwind CSS, MUI, and HeroUI to deliver responsive, performant interfaces. I implemented real-time data visualisation using Cytoscape.js and managed asynchronous data streams via REST APIs and WebSocket connections, achieving sub-second status refresh cycles across monitored devices.

Beyond feature development, I take a deliberate approach to code quality and architecture. I applied Atomic Design principles to build a library of reusable components that reduced redundant code by approximately 40% and measurably accelerated sprint delivery. I collaborated closely with backend engineers in a two-week Agile sprint cycle and upheld code standards through GitLab-based peer reviews and merge request workflows.

I am equally enthusiastic about Frontend Developer and Full Stack Developer roles. My self-learning with Node.js and Express.js alongside JavaScript and TypeScript, combined with a solid understanding of API design and data flow, means I am well positioned to contribute across the stack. I am a self-motivated learner and I actively seek environments where I can deepen my backend exposure further.

I would welcome the opportunity to discuss how my skills and experience align with your team's needs. Please find my CV attached for your reference. I am available at your convenience for an interview and can be reached at khinsuwai009@gmail.com or (+66) 629-853-725.

Thank you for your time and consideration.

Yours sincerely,

Khin Su Wai

Frontend Developer
