PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building scalable, high-performance web applications using React, Next.js, and TypeScript. Specialized in real-time monitoring dashboards, interactive data visualizations, and API-driven interfaces. Proven ability to architect reusable component systems, optimize rendering performance, and integrate complex asynchronous data streams in production environments. Experienced in Agile, cross-functional teams with a strong focus on responsive UI development and accessibility. Open to remote and onsite opportunities globally.

WORK EXPERIENCE

Frontend Developer

XENOptics Co., LTD — Chiang Mai, Thailand Oct 2023 – Mar 2026

- ▶ Developed and maintained NMS and EMS systems for monitoring network devices across live production environments, serving as the primary frontend engineer for mission-critical infrastructure tools.
- ▶ Built real-time monitoring dashboards using React and Tailwind CSS, improving operational efficiency and reducing manual reporting time by ~30%.
- ▶ Designed and implemented interactive network topology visualizations using Cytoscape.js, enabling engineers to detect system failures at a glance and reducing diagnosis time.
- ▶ Architected reusable UI component libraries following Atomic Design principles, reducing code redundancy by ~40% and accelerating sprint delivery cycles.
- ▶ Integrated REST APIs and managed asynchronous data streams using Redux Toolkit and WebSocket, achieving sub-second status refresh cycles in live production.
- ▶ Collaborated with backend engineers in Agile sprint cycles — participating in sprint planning, standups, code reviews, and async cross-functional communication.
- ▶ Maintained code quality through GitLab workflows including merge request approvals, branch management, and peer code reviews.

Tech Stack: React, TypeScript, Next.js, Tailwind CSS, MUI, HeroUI, Redux Toolkit, Cytoscape.js, WebSocket, Python, GitLab

PROJECTS

Network Monitoring Dashboard

- ▶ Built a real-time dashboard using React, TypeScript, and WebSocket for live network system monitoring with sub-second data refresh.
- ▶ Implemented dynamic topology visualization with Cytoscape.js, providing engineers with instant insight into device relationships and failure states.
- ▶ Optimized rendering performance to handle large-scale, high-frequency data updates without UI degradation.

Portfolio Website → [Live Demo](#)

- ▶ Built a responsive, performance-optimized portfolio using Next.js and Tailwind CSS, showcasing frontend projects and UI/UX capabilities.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Next.js, Redux Toolkit, React Router, Tailwind CSS, MUI, HeroUI, React Testing Library

Tools & Platforms: Git, GitHub, GitLab, Vercel, Vite, Figma, Postman, WebSocket, Cytoscape.js, Jest

Concepts: REST APIs, Responsive Design, Atomic Design, Performance Optimization, Agile/Scrum, Accessibility (a11y), Remote Collaboration

CERTIFICATIONS

The Ultimate React Course 2025: React, Next.js, Redux & More

Udemy • 2025

EDUCATION

Bachelor of Business Administration (BBA) **GPA: 3.80**

Siam University International College, Bangkok • Aug 2016 – Feb 2018

MCC i Training Institute

Yangon • Jan 2014 – Dec 2015

ADDITIONAL INFORMATION

Languages: Burmese / Myanmar (Native) • English (Professional Proficiency)
